It's time for smart living

EASY AND SMOOTH

If you are looking for a simple and nicely designed panel to control your home, here's what you need. A product of WIFI series, Venera Switch is elegantly designed by TIS to help you control lights, curtain, and shutters.

Venera is a wall touch switch which enables multiple management options. All it takes for it to work is three steps: remove your old switch and install the new one, connect it to Internet, then control it. No matter if your residence is an apartment or a house with a big yard; once you replace the old switches, Venera is ready to start the journey.

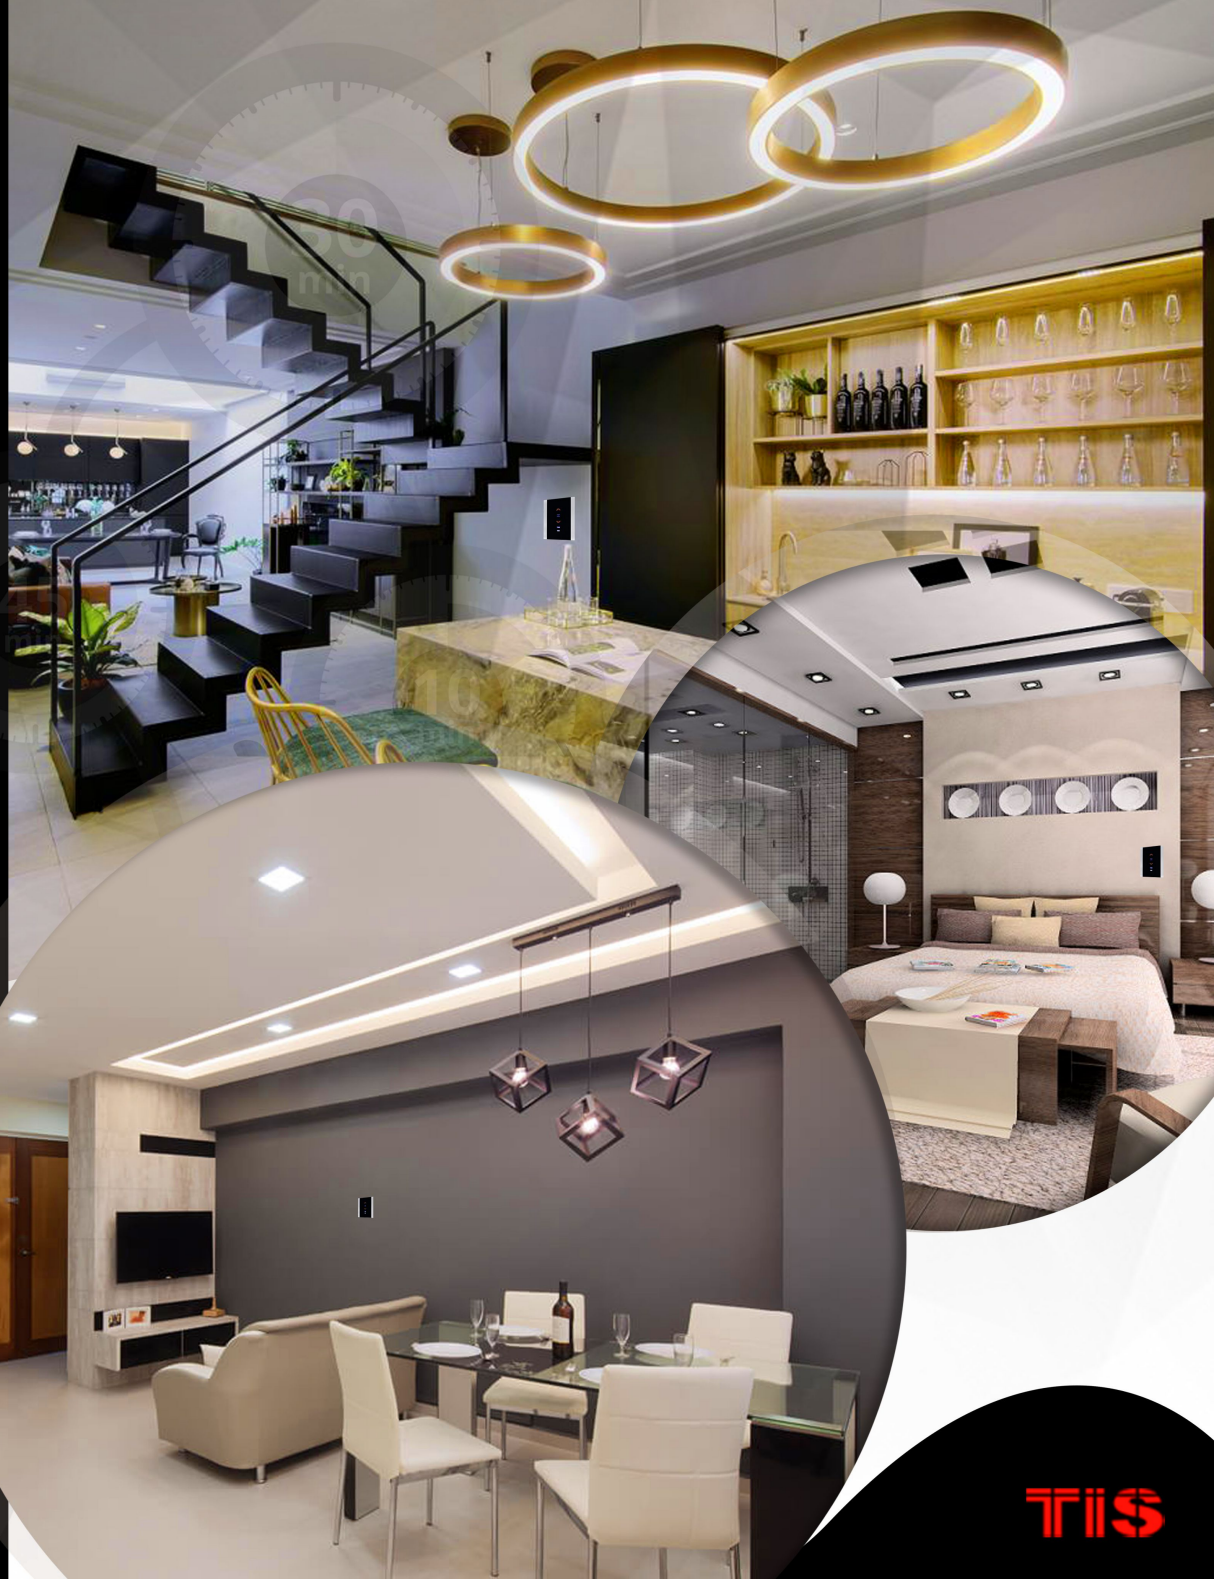

All you have to do for its activation is to connect it to an Internet Modem via your cellphone, then you can control your home from every horizon; Venera switch has a 2.4 Hz inbuilt WIFI and that means you always have access to your home. When you are away at a mission and you want your apartment flowers to receive some sunlight, all you have to do is to collect living room curtain for a couple of hours with your smart phone.

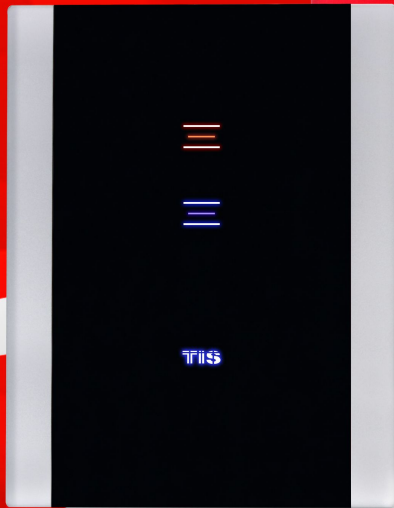

Moreover, feel free to command Venera limitlessly; no matter it is your bedroom lighting or the whole lighting system in your residence. It can do it all. Venera Switch panel can be linked to other TIS smart devices via local network. It means that one panel can control all other panels, also from your app you can control every other TIS devices at your home by means of this panel.

Further, Venera has an online timer which is very beneficial. You can set its internal schedule to turn off yard lights whenever the sun rises. Or imagine when it is noon and the sun shines at most, you can set Venera to open curtains so that your furniture remains intact.

Additionally, this device has an energy meter and provides both monthly and annual report on the electricity consumption. This gives you insights regarding your consumption and necessity of energy management.

Another good news is that the option of remote control is available for those who prefer such controllers. This switch may solve many of your grandparents' difficulties. They do not need to worry about lights in yard at night. They do not have to walk to a switch to turn it off; just provide them with a remote control.

VENERA
SERIES

With its advanced design & user-friendly function, Venera Series smart panel gives you more control, convenience & luxury in your home. It is a perfect choice for your living room, bedroom, kitchen, bathroom, etc. It is a perfect choice for your living room, bedroom, kitchen, bathroom, etc. It is a perfect choice for your living room, bedroom, kitchen, bathroom, etc.

This smart panel is available in two colors of Black and White, but that is not all; you can personalize the LED button colors. If you have a simple wallpaper, you might want to have a pink button color to seem as blossoms on your wall, or if black goes well with the white piano over there in living room, just go to the setting and choose this color. There is a wide spectrum of 256 colors and you may also remain the LED light half off so it would be easy to find at nights.

With its user-friendly function, Venera Switch is here to assist you live a convenient technological life.

Let's write the future together.
